Luis A. Flores

Full-Stack Web Developer

Denver, CO 80204
(760) 550-0674
LFlores02142@gmail.com

PROJECTS

Tagger Email — *Email Client*   *January - March 2020*

- Tagger Email is an email client that provides a better way of searching through emails by using a data-science based approach to searching
- Worked remotely with a group of 5 developers, using release canvases and product cycles to build and deploy features
- Implemented secure login using Google's OAuth2 system
- Created views for emails while containing HTML and CSS using iframes
- Implemented email sending functionality using token authentication and NodeMailer

View code here.

Weight Lifting Journal — *RESTful back-end API*   *January 2020*

- Weight Lifting Journal is a web-based application that allows users to keep track of their weight lifting journey
- Delivered a RESTful Web-based API using Node.js, Express, and SQLite3, that allows users to register, login and perform CRUD operations
- Used JSON WebToken for authentication and security. Added restricted middleware to routes, to prevent unauthorized access to endpoints
- Built unit tests using Jest and Supertest

View code here. View app here.

Plant Parenthood — *Frontend application*   *December 2019*

- Built a front-end React application to help users keep track of when to water their plants
- Implemented Redux for state management
- Used AXIOS to allow user to perform full CRUD operations, utilizing a 3rd party API
- Built out routes and private routes using react-router-dom

View code here. View app here.

Vegan Meets — *Frontend application*   *November 2019*

- Built a front-end React application to help users find vegetarian and vegan friendly restaurants
- Built login and register components using Formik and yup for form validation
- Implemented search functionality
- Used AXIOS to allow user to perform full CRUD operations, utilizing a 3rd party API
